

# ROCK SOPMOD M14

## SPECIAL OPERATIONS PECULIAR MODIFICATION

7.62mm NATO

### COMPACT, RELIABLE, RUGGED & ACCURATE FIREPOWER

The SOPMOD M14 is a gas operated, air cooled magazine fed, semi-automatic Multi Role Weapon System™. The enhanced battle proven design increases stability, accuracy and life cycle expectancy. The SOPMOD M14 features a magnesium and titanium alloy stock that decreases weight and increases strength. The low recoil, rigid modular stock, compact size (29" collapsed), Picatinny rail system, and 7.62mm NATO Firepower combine to yield unprecedented, rapid deployment capability, controllability and sub minute of angle long range accuracy.

### COMMONALITY

The SOPMOD shares common features with the M14 rifle. The SOPMOD's operating controls and handling characteristics are immediately familiar to troops trained in operation of the M14. It uses the same wide variety of ammunition as the M14 including M852, M118LR, M993, M160, M276, M59, M61, M62 M80, M82 and all commercial .308 caliber cartridges.

The commonality of the SOPMOD M14 magazine and parts with the M14 significantly reduces training and logistics required to introduce the SOPMOD into military and law enforcement service.

### SPECIFICATIONS

	<u>English</u>	<u>Metric</u>
Caliber	.308 Winchester	7.62mm x 51mm NATO
Magazine Capacity	20 Rds	Accepts any M14 magazine
Weight Empty	9.5 pounds	4.3 kilograms
Overall length – collapsed	29 inches	187 centimeters
Overall length – extended	36 inches	232 centimeters
Maximum effective range	840 yards	700 meters
Barrel length	16.5 inches	106.45 centimeters
Rifling	1 turn in 11.27" 5R cut rifled heavy barrel	
	Full M14 type with integral front sight. Picatinny Standard mounting rails at 3-6-9-12 o'clock for easy mounting of all military optics and accessories.
