

CONTROLS MODERATE-TO-SEVERE BLEEDING, PROMOTES RAPID COAGULATION

Temporary Traumatic Wound Treatment

A revolutionary high performance hemostatic marine biopolymer designed to control arterial bleeding by cross-linking red blood cells. CELOX™ is a proprietary blend of materials, containing chitosan and is designed as a temporary external wound treatment for the control of severe bleeding. Unlike other hemostatic agents CELOX™ is not affected by hypothermia (low body temperature) or the presence of heparin (an anticoagulant or blood thinner). CELOX™ is non-exothermic (does not generate any heat). It will not cause skin burns or tissue damage and has no known side effects. CELOX™ is available in two easy-to-open, sterile packages of 15g and 35g. The 15g package is for superficial bleeds and the 35g package is for large, moderate-to-severe bleeds. FDA Approved.

Available Sizes:

CELOX™ 35g Pouch
CELOX™ 15g Pouch

Blist-O-Ban®

STOPS BLISTERS AND HOT SPOTS. ELIMINATES PAIN.

Equipment for the Skin™

Engineered to eliminate friction at the source, minimize pain, and thereby delay or prevents skin breakdown, Blist-O-Ban® bandages work because the central dome collapses and produces a gliding movement. This effectively redirects the pressure away from the area protected. The bandage is composed of two bonded layers of low-friction polyethylene breathable plastic film with perforations that release heat and moisture. These layers slide smoothly against each other, rather than your skin. Blist-O-Ban® provides dramatic pain relief perfect for any outdoor adventure, athletic event or endurance activity.

Available Sizes:

6-PACKS
Small, Medium, Large and
Multi Pack (2 of each size)

100-COUNT BOX
SMALL, MEDIUM, LARGE

Available Colors:
Orange, Blue or Clear

SAM® OnScene guide

QUALITY NOTES IN THE FIELD. CONSISTENT PATIENT ASSESSMENT.

Assessing patients on-the-scene is easier than ever with the SAM® OnScene Guide. The product is a durable, waterproof, write-on and wipe-off note pad containing essential assessment questions for the most common emergency calls. A useful tool for patient assessment in the field and a convenient reference for completing reports. Many questions can be answered by checking or circling responses. One size fits all and is available in orange or black and designed to work for left-handed and right-handed users.

SAM® SPLINT

THE GOLD STANDARD. THE MOST UNIVERSAL SPLINT ON THE PLANET

The Pocket Cast™

The SAM® Splint is the most universal splint available. It can be used to splint any bone in the body and is ideal for use in the field on tactical operations. It features a thin core of aluminum alloy sandwiched between two layers of closed-cell foam, making it pliable yet strong. It can be bent into any of three simple curves to support any fractured or injured limb. With its strength derived from curves, the SAM® Splint is incredibly lightweight (only 4 ounces). No other device offers so many variations for the treatment of orthopedic emergencies. Also available as the SAM® SPLINT XL at 5.5" wide, for improved support and immobilization of larger individuals.

- LIGHTWEIGHT
- REUSABLE
- RADIOLUCENT
- WATERPROOF
- COMPACT
- VERSATILE

Available Sizes

SAM® SPLINT XL 36" **NEW**

SOFT SHELL® Splint

IMMOBILIZES SOFT TISSUE INJURIES AND FOREARM FRACTURES

The economical splint for splinting forearm injuries in emergency rooms, doctors offices or any health clinics, the Soft Shell® Splint is comfortable and quickly applied, washable with no clean up required. Simply shape it, wrap or strap it into place, and you're done. Designed to be an alternative to plaster, fiberglass, and thermoplastic splints, the Soft Shell is the most versatile forearm splint available today.

Orange, Royal Blue, Red,
Light Blue and Purple

SAM Sling®

STABILIZES PELVIC FRACTURES, STOPS COMPRESSION AT THE CORRECT FORCE

With Patented AutoStop Buckle

The SAM Sling® is the first and only force-controlled circumferential pelvic belt designed to provide safe and effective stabilization of open-book pelvic fractures for emergency medical providers and military medics. The SAM Sling's patented "auto-stop" buckle reduces pain, slows bleeding, and promotes clot formation by providing the right amount of compressive force. The buckle simply won't allow the belt to be over-tightened, which can lead to further damage

Available Colors

OD Military Green, Black, Emergency Blue/Orange
(Standard size only for black/01)

Available in 3 sizes

Extra Small (27-47" or 69-119cm)
Standard (32-50" or 81-127cm)
Extra Large (36-60" or 91-152cm)
