MILKOR USA Inc. ANNOUNCES ITS:

40mm MULTIPLE GRENADE LAUNCHER - MGL-140

The internationally combat proven concept of a semi-automatic, hand-held, revolving action, 40mm multi-shot grenade launcher (MGL) is now manufactured, marketed and supported in the United States of America.

Announcing its MGL-140 at the DSEi 2005 exhibition in London, England, Richard Solberg Jr., president of Milkor USA Inc. said the unique weapon system, offered with ammunition from MEI of Perry, Florida more than meets the requirements of the US military.

“During numerous user demonstrations within the US, the MGL-140 stood out as the ultimate Squad-Level weapon for the Infantry and Special Forces in terms of accuracy, functionality and unsurpassed firepower.”

Milkor USA in partnership with MEI have created a formidable 40mm Team, combining an innovative weapon system with superior 40mm ammunition to include NATO Standard 40x46mm grenades as well as MEI's new range of innovative lethal and non-lethal 40mm grenades. The MGL-140 is displayed alongside MEI's products as DSEi 2005 exhibition in London, England.

According to Mr Solberg, the MGL-140 is currently in use by agencies within the Department of Homeland Security and the US Department of Defense to include US Special Forces deployed in the War on Terror. He also used the opportunity to announce Milkor USA's contract with the US Marine Corps.

Milkor USA is a proud to be a 100% US owned and operated company, dedicated to providing the most advanced Multi-shot Grenade Launcher in the world to the best operators in the world.
