Re: Millennium Sensor Customer List

As you might expect, due to the special operations nature of many of our customers, we are unable to publish a complete and detailed listing of agencies using our technology. We can, however, provide you the following abbreviated customer information:

US Department of Defense  
US Department of Homeland Security  
Canadian Department of National Defence  
Royal Canadian Mounted Police  
Italian Ministry of Defence  
Swedish Department of Defence  
Japanese Defence Agency and local police agencies.  
German local police agencies.  
Houston, Miami, Los Angeles police and sheriffs agencies. [We also have sold hundreds of systems to small and mid-sized US local law enforcement agencies.]

In January, 2006, we were invited by the US Armament Research, Development and Engineering Center to demonstrate our technology. ARDEC is the Army's principal researcher, developer and sustainer of current and future armament and munitions systems.

Commencing in 2006, our technology will be featured in security training courses at the US Federal Law Enforcement Training Center in Glynco. Our systems also have been incorporated into numerous private special operations/law enforcement training programs.

Discrete references available on request.

A handwritten signature in blue ink, appearing to read 'Yvonne Burr', with a long horizontal stroke extending to the right.

Yvonne Wade Burr  
Chief Operating Officer
