ADVANCED WARFIGHTER MAGAZINE

ADVANCED WAREFIGHTER MAGAZINE

The L5 AWM is a hybrid magazine that combines the best features of polymer and steel magazine designs. Unique to the AWM is the one piece wrap-around hardened steel feed lip assembly that is permanently attached to an impact resistant polymer body. The hardened steel feed lips won't bend, break or deform due to rough handling or long term storage. An aggressive surface texture has been applied to the polymer body to improve gripping and retrieval from pouches. The combination of steel and polymer result in a lightweight, robust magazine tough enough for professional use.

The internal geometry of the Advanced Warfighter Magazine is a constant curve that has been maximized to feed the 5.56X45mm NATO round and includes a non-tilting follower for trouble free feeding. The feed lips are made from a single piece of precision formed steel that is hardened and then PTFE coated for corrosion resistance. The body and component materials are corrosion and chemical resistant, passing military chemical testing including exposure to DEET.

The L5 AWM is designed to work in multiple weapon systems; M4/M16/AR, HK416, SA80, SCAR-L / Mk16, ARX160 and is available in 20 and 30 round capacity with a translucent or opaque polymer body.

Features

- Made in the USA.
- Available in opaque Black, FDE, OD, Foliage Green and tinted Translucent
- Polymer body that is impact resistant through a wide range of temperatures
 - Can be dropped onto the feed lips without damage
 - Withstands 5' drop, fully loaded onto concrete at -40° F through +180° F
 - Can be stored loaded for extended periods of time without feed lip spreading
- Body and component materials that are corrosion and chemical resistant, passes military chemical testing including exposure to DEET.
- One piece hardened steel wrap-around feed lip assembly that is permanently attached to the polymer body.
- Steel feed lip assembly is PTFE coated for corrosion resistance.
- The Translucent version has round count markers at 20 and 30 rounds
- Aggressive surface texture
- Constant radius geometry and non tilting follower
- Same basic envelop as the USGI aluminum magazine

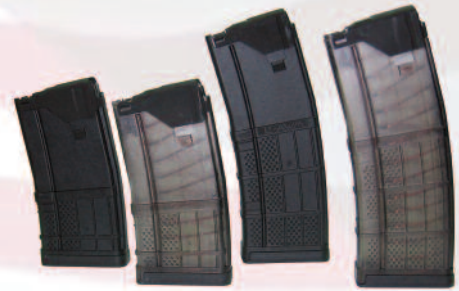

Specification

- Weapon Type: Multi-platform
 - M4 / M16 / AR15
 - H&K 416
 - SA80
 - ARX160
 - SCAR-L / Mk 16 Mod 0
- Caliber: 5.56 x 45 mm NATO
- Capacity: L5AWM30 - 30 rounds
L5AWM20 - 20 rounds
- Weight: Unloaded: L5AWM30 - 4.4 oz
L5AWM20 - 3.5oz
