

SAVES SOLDIERS' LIVES BAD GUYS CAN'T HIDE

BULLDOG 762™ M14/M1A SHORT RIFLE CONVERSION

PREVAIL!

The BullDog 762™ Gen-4 faithfully adheres to a simple philosophy: *The only good enemy is dead.*

Harsh? Not if you're soldiering in harm's way or if the enemy doesn't give a crap about your values and the reasons you're deployed.

Designed and manufactured by warfighters from every branch of the Armed Services – soldiers who understand your challenge and have walked in your boots before – the BullDog 762™ Gen-4 combines firepower and maneuverability in equally lethal portions.

CQB? You bet! Designated Marksman Accuracy? Of course! Fast and simple replacement of any M14 or M1A rifle stock? In a heartbeat!

Best of all: The enemy can't hide!

With patent pending safety features, two-stage trigger feel, an adjustable trigger rod length for the perfect trigger, 15" Picatinny Top Rail, 7" Picatinny Bottom Rail and 4" Picatinny Side Rails, the BullDog 762™ Gen-4 favorably alters the balance of firepower wherever it is deployed. The BullDog 762™ fits Inch or Metric rifles and converts in less than an hour without gunsmithing.

Visit our web site and check out *The US Army Future WarFighters* commercial featuring the BullDog 762™ Gen-4. Or contact us now for more information.
